Cayleb Alvarez-James

Forward Thinking Engineer

Connecticut, USA | Remote-only | caylebalvarezjames@gmail.com

github.com/cayleb-james2008 | cayleb-james2008.github.io/agentic-resume/

Summary

Forward Thinking Engineer. Focus: shadow employees, build each a custom AI agent plus tools for any digital task they want automated, teach, scale. Goal: lower costs, no cuts to people. Independent, AI-assisted developer.

Experience

Independent Project Development - AI-Assisted Software & Evaluation | Oct 2025-present

AI-assisted build, debug, test and review: local tools, API integrations, documented human next steps.

Selected Projects

Ergon - Personalized Employee Assistant & Remote Support

OpenClaw, Node.js, C#, Windows, SQLite

Ergon case study

- Built Windows employee-assistant installer: native Outis taskbar management, Linux support service. Employee data kept across upgrades.
- Built ticket-driven connector builds and device-scoped repair tools: screen input, Gateway-checked activation/rollback, shared AI budgets.

Industry AI Suite - Source-Grounded Review Tools

Python, HTTP APIs, Local LLMs, HTML/CSS/JavaScript

github.com/cayleb-james2008/industry-ai-suite | Review history implementation

- Built 10 local review tools: finance, research, security, operations. Source receipts. Explicit human review. Durable history, export, deletion.
- Added optional loopback model drafts from minimized findings. Exact citation checks. Explicit failure handling.

dotz - Multi-Agent Coding Dashboard

Rust, axum, Tauri, JavaScript, SQLite

github.com/cayleb-james2008/dotz

- Built Rust and Tauri agent desktop: model selection, supervised tools, platform-specific process cleanup.
- Made local model failures explicit. Safe cleanup retries. Core tests, lint, dependency checks pass on Windows, macOS, Linux.

Sophos - Coding-Agent Desktop

React, TypeScript, Tauri, JSON-RPC

github.com/cayleb-james2008/sophos

- Connected employee-selected agent profiles to real daemon sessions and local model catalogs. Durable transcripts. Restart recovery.
- Reconciled parallel source histories; kept lifecycle, security and build controls. App and daemon verified by regression tests.

Asmodeus - Research & Paper Replay

Rust, Historical Data, Local LLMs

Asmodeus case study

- Built research and paper replay: verified historical data, chronological evaluation, persisted cursors, fees, duplicate-fill prevention.
- Added keyless loopback model route: redirect and proxy guards. Chronological train/validation/test slices. Reviewable refutation records.

Skills

Languages: Python, Rust, TypeScript, JavaScript, HTML/CSS

Frameworks & data: React, Tauri, axum, REST, WebSockets, JSON-RPC, SQLite

AI & verification: Coding-agent orchestration, local LLM/API integration, source-grounded review, regression testing, pytest, Vitest, Cargo, Git/GitHub, Linux

Additional Experience

Robert H. Lord Company - Moving Crew | Summer 2025; 2026-present

David Cooke Plaster Co. - Plaster Work | Summer 2026

Dunkin' | 2024-2026

Tommy's Pizza | Summer 2024

Education

Portland High School | Portland, Connecticut | 2022-2026 | Graduated

Coursework: Cybersecurity; AP Computer Science

Selected engineering projects | Updated October 13, 2026.
