Summary

Forward Thinking Engineer. Focus: shadowing employees to learn how they work, building each person a custom AI agent that fits their day, and teaching them to use it well, then scaling across the company. Independent, AI-assisted developer of local workflow tools, desktop interfaces and source-grounded review workflows. Background includes service and hands-on work.

Experience

Independent Project Development - AI-Assisted Software & Evaluation | Oct 2025-present

Direct AI-assisted implementation, debugging, testing and review of local tools, API integrations and documented human next steps.

Selected Projects

Ergon

- Built and delivered a Windows assistant installer with native Outis management, connector builds and device-scoped screen-support tools.

Industry AI Suite

- Built ten source-grounded review tools with human review, durable history, export and deletion; the current suite passes 382 tests.

dotz

- Built a Rust and Tauri coding-agent desktop with supervised tools; Linux, Windows and macOS CI passed.

Sophos

- Connected agent profiles and local model catalogs to real daemon sessions, with durable transcripts and restart recovery.

Asmodeus

- Built a research and paper-replay system with historical-data provenance, chronological evaluation and restart-safe simulated fills.

Skills

Python | Rust | TypeScript | JavaScript

React | Tauri | REST | SQLite

AI/API integration | Source-grounded review

Git | Linux | pytest | Vitest | Cargo

Additional Experience

Robert H. Lord Company - Moving Crew | Summer 2025; 2026-present

David Cooke Plaster Co. - Plaster Work | Summer 2026

Dunkin' | 2024-2026

Tommy's Pizza | Summer 2024

Education

Portland High School | Portland, Connecticut | 2022-2026 | Graduated

Coursework: Cybersecurity; AP Computer Science

Selected engineering projects | Updated October 13, 2026.
