Cayleb Alvarez-James

Forward Thinking Engineer

Connecticut, USA | Remote-only | caylebalvarezjames@gmail.com

github.com/cayleb-james2008 | cayleb-james2008.github.io/agentic-resume/

Summary

Forward Thinking Engineer. Focus: integrate AI, custom-built around each company's tools, workflows and needs; shadow employees, build agents and tools for any digital task, teach, scale. Goal: lower costs, no cuts to people. Independent, AI-assisted developer.

Experience

Independent Project Development - AI-Assisted Software & Evaluation | Oct 2025-present

Builds, tests and fixes software with AI help: local tools, app connections, clear next steps for people.

Selected Projects

Ergon

- Built a Windows installer for employee AI assistants, remote-repair tools and automatic connections to everyday apps.

Industry AI Suite

- Built 10 review tools where every finding shows its source and a person decides; optional AI drafts with citations.

dotz

- Built a desktop app that runs and supervises AI coding agents; core tests pass on Windows, macOS and Linux.

Sophos

- Connected saved agent profiles and local AI models to a coding-agent app, with sessions that survive restarts.

Asmodeus

- Built a research tool that tests trading ideas on real past market data, in time order, with no real money.

Skills

Python | TypeScript | JavaScript | Rust

AI agents | automation | desktop and web apps

Automated testing | Git | Linux
