

Project résumé / selected verified work

Cayleb Alvarez-James · Security-first applied AI and systems engineering

[GitHub profile](#)

This is a project résumé of selected verified work, not a complete career-history record.

ESTABLISHED PUBLIC WORK

- **dotz**: local-first multi-agent coding dashboard in Rust/axum and Tauri. [Public repository](#)
- **Sophos**: public Windows coding-agent project; its README describes a port of Prime Intellect's Prime Agent and credits the upstream runtime, daemon, and bridge to that team. No sole-author claim is made. [Public repository](#)

DATED PUBLIC-DATA SLICES

- **Treasury / LedgerBridge**: 10 public DTS rows accounted exactly once; IDs `2026-09-21:II:1`–`2026-09-21:II:10`, as-of 2026-09-21 (day), retrieved 2026-09-23 16:21:57 UTC. [Exact query](#) · [Treasury terms](#). Public federal cash, not company books.
- **World Bank / MarketBrief + BacktestGuard**: 15 annual U.S. GDP records; 5.02% nominal 2024–2025 change and a 2020 chronology split; records retrieved 2026-09-23 18:51:34 UTC. [Exact series](#) · [Official indicator/license proof](#): HTTP 200, exact label "License : CC BY-4.0," checked 2026-09-23 17:15:50 UTC. Broad macro context only; no real external experiment log or source-release timing is verified.
- **CISA / SentinelDesk**: 1,721 public KEV entries; example `CVE-2026-93952`, as-of 2026-09-22 (day), retrieved 2026-09-24 09:29:57 UTC. [Feed](#) · [CC0 terms](#). Public threat context, not company alerts/assets.
- **GitHub / PipelineRelay**: `pytest-dev/pytest`, repository ID `37489525`, `updated\_at` 2026-09-23 11:49:07 UTC; metadata retrieved 2026-09-23 16:21:57 UTC. [Metadata](#) · [MIT license record](#). Public repository research, not CRM, customer or consent data.
- **OPM / HandoffHub + OnboardPath**: 10 public metadata records; matching GovInfo text for `2026-19222`, published 2026-09-18. The P1b workflow reads were retrieved 2026-09-24 16:03:29 UTC. [Exact query](#) · [Official GovInfo text](#) · [GovInfo public-domain policy](#). Narrow public-document discovery/text only—not internal knowledge, permissions, employer policy, or employee records.
- **ReplyCraft**: a clearly labeled synthetic public-policy question about the comment deadline uses the GovInfo DATES text read on 2026-09-24 16:03:29 UTC; the draft is for human review. [GovInfo DATES text](#). This is not a customer case or approved support policy.
- **SearchLift current Pages read**: at the lead's read, the public page was as of 2026-09-25 14:50:52 UTC and retrieved at 19:43:45 UTC. A bounded projection of title, meta description, headings, and paragraphs observed 10/10 distinct approved workflow names (one page; at most 20 headings, 30 paragraphs, and 1,000 characters per item). Evidence ID `SL-SRC-823863169a`; response SHA-256 `b4ed4de9f785a5059acde72c7660d6c20351d8409915c6323a252836b3001c88`; 0 issues and 0 side effects. AI NOT RUN in this structural review; AI remains UNVERIFIED. This is not an SEO result: rankings, traffic, analytics, links, images, and whole-site coverage were not assessed. Exact read URL: `https://cayleb-james2008.github.io/agentik-resume/`. [Public source repository](#) · [MIT terms](#).
- **SearchLift before-state (historical)**: a source read retrieved 2026-09-24 10:17:49 UTC returned an earlier revision with 0/10 approved workflow names; that page's `Last-Modified` was 2026-09-22 12:49:24 UTC. Historical evidence only, not current-page or performance evidence. The old Vercel page URL remains unlinked.

INDUSTRY AI SUITE · PUBLIC · WIP / INCOMPLETE

- **Full job · UNVERIFIED for all ten**: LedgerBridge, MarketBrief, ChainWatch, BacktestGuard, ReplyCraft, HandoffHub, PipelineRelay, OnboardPath, SentinelDesk, and SearchLift. **AI UNVERIFIED for all ten**. [Public suite code repository](#). The local candidate revision is WIP and unpublished.
- Five local model calls were independently witnessed by the lead on 2026-09-24. This verifies call execution only, not answer quality, complete workflows, or public AI claims. ChainWatch has no admitted public-data slice; ReplyCraft has only the labeled public-policy sample above. No revenue, customer, adoption, or company-deployment outcome is claimed.
- No trades, transfers, outreach, message sends, containment, hiring/disciplinary decisions, or automatic publishing. Consequential actions remain human-gated.

SYSTEMS PRACTICE

Python · Rust · axum · Tauri · HTML · CSS · JavaScript · local-first design · permission boundaries · source-linked evidence · human approval gates · audit trails · fail-safe workflow tests.
