

Résumé

Cayleb Alvarez-James

AI workflow developer · Connecticut

caylebalvarezjames@gmail.com

github.com/cayleb-james2008

SUMMARY

I build practical AI tools around real tasks: personalized assistants, connected workflows, and clear human review. My background combines independent software development with service and hands-on work.

EXPERIENCE

Independent project development

2026

Build and test AI workflow tools, coding-agent workspaces and desktop interfaces. Document sources, checks and the decisions people need to make.

Dunkin'

2024–2026

Robert H. Lord Company · Moving crew
Summers 2025 & 2026

Tommy's Pizza

Summer 2024

David Cooke Plaster Co. · Plaster work
Summer 2026

EDUCATION

Portland High School

Portland, Connecticut · Graduated 2026
Cybersecurity; AP Computer Science

SELECTED PROJECTS

Industry AI Suite ↗

Ten local review workflows with source receipts and human handoffs.

Sophos ↗

Windows agent workspace built on Prime Intellect's Prime Agent concept. Native UI checks over demo IPC.

dotz ↗

A workspace for organizing coding-agent work. Tested core and focused process improvements.

SKILLS

Python · Rust · TypeScript · JavaScript
React · Tauri · REST · SQLite
AI/API integration · Source-grounded review
Git · Linux · pytest · Vitest · Cargo

Project evidence: October 5, 2026 snapshot.
