# Cayleb Alvarez-James

Forward Thinking Engineer

Connecticut, USA | Remote-only | caylebalvarezjames@gmail.com

github.com/cayleb-james2008 | cayleb-james2008.github.io/agentic-resume/

## Summary

Forward Thinking Engineer. Focus: shadowing employees to learn how they work, building each person a custom AI agent that fits their day, and teaching them to use it well, then scaling across the company. Independent, AI-assisted developer of local workflow tools, desktop interfaces and source-grounded review workflows. Background includes service and hands-on work.

## Experience

### Independent Project Development - AI-Assisted Software & Evaluation | Oct 2025-present

Direct AI-assisted implementation, debugging, testing and review of local tools, API integrations and documented human next steps.

## Selected Projects

### Industry AI Suite - Source-Grounded Review Workflows

Python, HTTP APIs, Local LLMs, HTML/CSS/JavaScript

github.com/cayleb-james2008/industry-ai-suite | Merged PR #1 | September 26 evidence pack | Recorded workflow lab

- Built 10 bounded local review workflows with public or permitted inputs, including Treasury-row reconciliation, cited research checks, CISA vulnerability triage and public-policy review. Retained dated source receipts and documented human next steps.
- Local post-merge suite on public main: 370 tests and 178 subtests passed. Recorded examples are synthetic demonstrations; all ten full workflows remain UNVERIFIED.
- September 26 witness record: 6 local-model exchanges; 5 cited outputs passed citation-ID checks and narrow source review. Retained a privacy-filter/citation failure and its documented corrected retry.

### Sophos - Windows Coding-Agent Desktop Integration

TypeScript, React, Tauri, Rust, Node.js

github.com/cayleb-james2008/sophos | Open draft PR #10 | PR #10 push CI | PR #10 pull-request CI | Open draft PR #9 (baseline) | PR #9 runtime/MSI baseline

- Integrated Windows/Tauri and React/TypeScript views for Prime Intellect's open-source Prime Agent. Prime Intellect supplies the upstream runtime, daemon and bridge.
- Verified inbox read state and theme/profile persistence after restart in native Windows UI using demo IPC; live provider inference was not verified. Draft PR #10: 8 suites, 57 case results without skip markers and 2 skipped interaction branches.
- Separate draft PR #9 baseline: 1,122 frontend tests and 47/47 Windows named-pipe checks passed; Windows x64 native-module loading and guarded MSI packaging verified. Neither draft establishes a release.

**dotz - Multi-Agent Coding Dashboard**

Rust, axum, Tauri, JavaScript, SQLite

github.com/cayleb-james2008/dotz | Open draft PR #218

- Integrated a local-first dashboard with a Rust/axum API, parallel coding-agent workflows, an inspectable graph, local memory and REST/WebSocket endpoints.
- Isolated local Linux dotz-core: 824/824 passed; monitor-unit and platform-regression checks: 5/5 each. Draft PR #218; hosted Ubuntu core CI failed. Whole-app acceptance, merge and release were not established.

## Skills

Languages: Python, Rust, TypeScript, JavaScript, HTML/CSS

Frameworks & data: React, Tauri, axum, REST, WebSockets, JSON-RPC, SQLite

AI & verification: Coding-agent orchestration, local LLM/API integration, source-grounded review, regression testing, pytest, Vitest, Cargo, Git/GitHub, Linux

## Additional Experience

Robert H. Lord Company - Moving Crew | Summer 2025; 2026-present

David Cooke Plaster Co. - Plaster Work | Summer 2026

Dunkin' | 2024-2026

Tommy's Pizza | Summer 2024

## Education

Portland High School | Portland, Connecticut | 2022-2026 | Graduated

Coursework: Cybersecurity; AP Computer Science

Project evidence and PR states: October 5, 2026 snapshot; not rechecked for this revision. Work history and education are self-reported.
