Cayleb Alvarez-James

Forward Thinking Engineer

Connecticut, USA | Remote-only | caylebalvarezjames@gmail.com

github.com/cayleb-james2008 | cayleb-james2008.github.io/agentic-resume/

Summary

Forward Thinking Engineer. Focus: integrate AI, custom-built around each company's tools, workflows and needs; shadow employees, build agents and tools for any digital task, teach, scale. Goal: lower costs, no cuts to people. Independent, AI-assisted developer.

Experience

Independent Project Development - AI-Assisted Software & Evaluation | Oct 2025-present

Builds and tests local AI agents, desktop software and app connections; 3,300+ automated checks across 5 systems.

Selected Projects

Ergon (OpenClaw, Node.js, C#, Windows, SQLite)

- Built a signed Windows installer for employee AI assistants, remote repair and approval-gated app connections; 622 tests pass.

Industry AI Suite (Python, local AI models, web APIs)

- Built 10 local review tools where every finding shows its source and a person decides; 382 Python tests pass.

dotz (Rust, Tauri, JavaScript, SQLite)

- Built a desktop app supervising AI coding agents with safe cleanup; 828+ core tests pass on Windows, macOS and Linux.

Sophos (React, TypeScript, Tauri)

- Connected saved agent profiles and local AI models to a coding-agent app; 1,224 interface and 56/56 Windows checks pass.

Asmodeus (Rust, historical market data, local AI models)

- Built a research tool testing trading ideas on past market data in time order with no real money; 1,111 checks.

Skills

Python | TypeScript | JavaScript | Rust

AI agents | automation | desktop and web apps

Automated testing | Git | Linux
