Cayleb Alvarez-James

Forward Thinking Engineer

Connecticut, USA | Remote-only | caylebalvarezjames@gmail.com

github.com/cayleb-james2008 | cayleb-james2008.github.io/agentic-resume/

Summary

Forward Thinking Engineer. Focus: integrate AI, custom-built around each company's tools, workflows and needs; shadow employees, build agents and tools for any digital task, teach, scale. Goal: lower costs, no cuts to people. Independent, AI-assisted developer.

Experience

Independent Project Development - AI-Assisted Software & Evaluation | Oct 2025-present

Builds and tests local AI agents, desktop software and app connections; 3,300+ automated checks across 5 systems.

Selected Projects

Ergon - Personal Work Assistants & Remote Support

OpenClaw, Node.js, C#, Windows, SQLite

Ergon case study

- Built a signed Windows installer, taskbar setup app and live update feed for employee AI assistants; user data survives updates.
- Built ticket-scoped remote repair and automatic connectors to existing company apps, with approval gates, undo steps and 622 passing tests.

Industry AI Suite - Source-Checked Review Tools

Python, local AI models, web APIs

github.com/cayleb-james2008/industry-ai-suite | Review history implementation

- Built 10 local tools that review finance, research, security and operations files; every finding shows its source and a person decides.
- Added optional local AI drafts that halt if sources are missing, plus review history, export and delete (382 Python and 19 browser tests).

dotz - AI Coding Agent Dashboard

Rust, Tauri, JavaScript, SQLite

github.com/cayleb-james2008/dotz

- Built a desktop app that runs and supervises AI coding agents, with model choice, process-tree cleanup and clear local failure states.
- Verified across Windows (828), macOS (831) and Linux (839) core automated tests; all 6 hosted check jobs pass.

Sophos - Coding-Agent Desktop App

React, TypeScript, Tauri

github.com/cayleb-james2008/sophos

- Connected saved agent profiles and local AI models to a Windows coding-agent desktop app, with sessions and transcripts that survive restarts.
- Context summaries use the agent service and provider failures keep saved settings; 1,224 interface, 82 Node and 56/56 Windows checks pass.

Asmodeus - Trading Research on Past Data

Rust, historical market data, local AI models

Asmodeus case study

- Built a private research tool that tests trading ideas on real past market data in strict time order, with fees and no real money.
- Added safeguards against peeking at future data, restart recovery and rejected-idea logs; 1,111 Rust and 33 Python tests pass.

Skills

Languages: Python, Rust, TypeScript, JavaScript, HTML/CSS

Apps & data: React, Tauri, SQLite, web APIs

AI & testing: AI agents and automation, local AI models, source-checked review, automated testing, Git/GitHub, Linux

Additional Experience

Robert H. Lord Company - Moving Crew | Summer 2025; 2026-present

David Cooke Plaster Co. - Plaster Work | Summer 2026

Dunkin' | 2024-2026

Tommy's Pizza | Summer 2024

Education

Portland High School | Portland, Connecticut | 2022-2026 | Graduated

Coursework: Cybersecurity; AP Computer Science
